## Objectives and Priorities of Decentralised Actions in Education and Training

In this briefing sheet, the focus is on decentralised actions in Key Action 1 and Key Action 2, specifically in relation to education and training. These actions specifically target improved levels of competence and skills ensuring relevance to the labour market; increased opportunities for mobility; strengthened cooperation between education, training and the world of work and the emergence of a European lifelong learning area; enhanced quality, innovation, excellence and internationalisation in education and training delivery; improved policy cooperation and capacity building through greater collaboration between Programme and non-Programme countries and the teaching and learning of languages to promote the EU's broad linguistic diversity and intercultural awareness.

### Key Action 1

For individual (staff, student/learner) mobility within education and training, the following objectives exist:

- to support learners in the acquisition of learning outcomes (knowledge, skills and competences) with a view to improving their personal development, their involvement as considerate and active citizens in society, and their employability in the European labour market and beyond;
- to support the professional development of those who work in education, training and youth with a view to innovating and improving the quality of teaching, training and youth work across Europe;
- to notably enhance participants' foreign languages competences;
- to raise participants' awareness and understanding of other cultures and countries, offering them the opportunity to build networks of international contacts, to actively participate in society and to develop a sense of European citizenship and identity;
- to increase the capacities, attractiveness and international dimension of organisations active in the education, training and youth fields so that they are able to offer activities and programmes that better respond to the needs of individuals, within and outside Europe;

- to reinforce synergies and transitions between formal, non-formal education, vocational training, employment and entrepreneurship;
- to ensure better recognition of those competences gained through learning periods abroad.

## Key Action 1: International Credit Mobility

Key Action 1 also supports international mobility activities from or to Partner Countries in the fields of higher education and youth, for which the following objectives, priorities and principles apply:

- to enhance the attractiveness of higher education in Europe and to support European higher education institutions in competing on the higher education market worldwide;
- to support the priorities identified in European Commission Communications on the “New European Consensus on Development” and “European Higher Education in the World”;
- to support the internationalisation, attractiveness quality, equity of access and modernisation of higher education institutions outside Europe in view of promoting the development of Partner Countries;
- to promote the development and external policy objectives and principles including national ownership, social cohesion, equity, proper geographical balance and diversity. Special attention will be given to the least developed countries as well as to disadvantaged students from poor socio-economic backgrounds and to students with special needs;
- to promote non-formal learning and cooperation in the field of youth with Partner Countries.

## Key Action 2

For strategic partnerships in education, training and youth, irrespective of the type of strategic partnership, the following HORIZONTAL PRIORITIES exist:

- **Supporting Opportunities for All in Acquiring and Developing Key Competences**, including basic skills: In order to foster employability, socio-educational and personal development, as well as participation in civic and social life. Priority will be given to projects that support and reinforce the development of key competences for all individuals from early childhood and throughout life. In a fast-changing world, this includes multilingual competences, entrepreneurial mind-set, critical thinking and creativity, cooperation in science, technology, engineering, arts and mathematics (STE(A)M) fields, as well as skills in fields such as climate action, artificial intelligence, but also social and learning-to-learn competences. This would include actions of cooperation with players in the research and innovation sector, civil society as well as in the private and public sector;
- **Social Inclusion**: social inclusion is an overarching priority across all sectors of the programme. Promote – in particular through innovative and integrated approaches – ownership of shared values, equality, social inclusion, diversity and non-discrimination. Priority will be given to projects that support and assess new approaches to reducing disparities in accessing and engaging with formal and non-formal education, as well as projects that tackle discrimination, segregation and racism. The programme will support the integration of people with migrant backgrounds, including gathering and disseminating good practices on the issue. Priority will also be given to projects that encourage the establishment of sustainable links between organisations active in education, training, youth and sport and the society at large, including at local and regional level;
- **Common Values, Civic Engagement and Participation**: the Programme will support active citizenship and ethics in lifelong learning; it will foster the development of social and intercultural competences, critical thinking and media literacy. Priority will also be given to projects that offer opportunities for people's participation in democratic life, social and civic engagement through formal or non-formal learning activities. The focus will also be on raising awareness on and understanding the European Union context, notably as regards the common EU values, the principles of unity and diversity, as well as their social, cultural and historical heritage;

- **Environmental and Climate Goals:** the programme aims to support, across all sectors, awareness-raising about environmental and climate-change challenges. Priority will be given to projects aimed at developing competences in various sustainability-relevant sectors, developing green sectorial skills strategies and methodologies, as well as future-oriented curricula that better meet the needs of individuals. The programme will also support the testing of innovative practices to prepare learners, staff and youth workers to become true factors of change (e.g. save resources, reduce energy use and waste, compensate carbon footprint emissions, opt for sustainable food and mobility choices, etc.). Priority will also be given to projects that – through education, training, youth and sport activities - enable behavioural changes for individual preferences, consumption habits, and lifestyles;
- **Innovative Practices in a Digital Era:** the Programme will support the taking up of digital technologies and of innovative and open pedagogies in education, training, youth and sport. Particular attention will be given to promoting gender equality and addressing differences in relation to the access and use by underrepresented groups.
